## Projects

---

### Handmade online shop [↗](#)

.Net project that allows the user, if they are a seller, to display their products and allows the buyer to view and choose the payment method ,and this empowers craftspeople to easily showcase and market their products, boosting their productivity. It also streamlines the buying and payment process for customers.

### E-commerce project [↗](#)

Basic E-commerce app with authentication and CRUD methods. I used NoSQL database for this project ,The site provides information on all tourist places in Egypt, covering various types of tourism, including medical, Entertainment, religious, and other tourism, in addition to the possibility of booking a tour guide through the site.

### Wep\_Scrap [↗](#)

This is a Web Scrap by Python for this Link:<https://www.imdb.com/chart/top/> To Extract the top movies and their Rank
